Karen Halbert

Dynamic symmetry and chaos theory transformed

Following a life-long dream, Karen Halbert has become a full-time oil painter, often painting "en plein air" in the fields of New Mexico. Driven by the light of the southwest, Karen made a life-style decision to move from NYC to Santa Fe, leaving behind careers as a Wall Street executive and Professor of Mathematics. She transforms the beauty of mathematics into her art, applying her knowledge of areas such as dynamic symmetry and chaos theory.

Watch for 2023 Announcement. Annual event in Las Campanas. After three years without this event due to Covid, we returned. The show is a gala event. In 2022 I demonstrated out on the patio and thoroughly enjoyed this. Flyer created by Las Campanas member, Susan Robeck, to be used as publicity for this 2022 Las Campanas Community Fund auction and perhaps the 2023 event
