

# Turbulent Lands VI Dynamic Symmetry

Karen Halbert Artist  
[www.karenhalbert.com](http://www.karenhalbert.com)

**Material** Oil  
**Size** 11x14 near Root PHI  
**Price**

Aspect Ratio- $14/11 = 1.2727...$  while root PHI =  $\text{Root } 1.619... = 1.2720..$  I painted Turbulent Lands VI before I started using the dynamic symmetry armature. Perhaps the shadow from the right cliff could have been more aligned with the baroque diagonal. The bottom of the cliff aligns nicely with the planned horizon line.
